

COMPANY PROFILE

THE ENGLEHART GROUP

For over 39 years astute new home buyers have been taking advantage of the Englehart Group's winning combination of innovative design, quality construction and value.

Englehart has established itself as a leader in the design and construction of luxury custom homes since completing its first award-winning display home in 1980 and beginning a new era in architectural design, creating homes with outstanding aesthetic appeal, functionality and energy efficiency.

Englehart Homes has a strong following in Melbourne's inner east and on the Mornington Peninsula, creating visually striking and highly functional, personalised designer homes. Lucas Morris Homes, an established brand acquired in the 1990s, complements Englehart, delivering homes at the more affordable end of the market.

Englehart's impressive design portfolio suits different lifestyles and stages, tastes and budgets and features high-end French provincial and Frank Lloyd Wright-inspired designs, modern contemporary and Australian contemporary homes.

Englehart clients from all stages of life share a common goal aligned with the Englehart reputation – to own a home crafted with quality finishes, innovation and the security of a homebuilding company that consistently produces excellence.

The company's winning business model is based upon satisfying an increasingly important market segment – buyers who want a high-end architecturally designed home with guaranteed results and without the risks of working with independent architects and contractors.

Englehart Homes has earned many industry awards and was Victoria's most awarded residential builder in 2017, emphasising its commitment to, and achievement of, innovation, quality and customer satisfaction. Earlier highlights include the HIA 2016 Professional Builder Award, the Inaugural Housing Industry Award for Low Energy Homes in 1984 and National Award Recognition in 1996.

Englehart, along with Lucas Morris, is building on its long track record for innovation, opening several industry-leading display homes in the blue-chip suburb of Balwyn and the Mirvac Tullamore estate in Doncaster.
